STAKEHOLDER NEED · SN-1
A researcher should be able to tell which established metrics have meaningful equivalents for skills.
traced from
PARENT · SYS-1
The pipeline shall compute all five metrics for every eligible skill.
justifies
RATIONALE
Formulas count words per sentence.
Pilot: raw Markdown lifts the median grade from 8.6 to 12.2.
Rejected: score raw text (inflated); strip all lists (drops instructions).
Assumes: CommonMark-style Markdown.
traced from
FUNCTIONS
F3.5.3 Convert Markdown to sentences: R3 (prose Markdown) to R5 (sentence text). Upstream: F3.5.2 supplies R3.
satisfies
REQUIREMENT · RD-2 (critical)
When prose contains a heading, list item or table row, the normalizer shall output it as its own sentence.
verified by
VERIFICATION · T05.1 (P2, M3)
20 hand-marked files. Pass: every heading, list item and table row is its own sentence; RD-2.1 is met.
allocated to
LOGICAL ELEMENTS
Skill parser sends prose to the Markdown normalizer, which sends sentences to the language identifier. Implemented with Python regex.
flows down to
DERIVED · RD-2.1
The segmenter shall assign every line of 20 hand-marked files to the correct stream.
