STAKEHOLDER NEED · SN-1
A researcher should be able to tell which established metrics have meaningful equivalents for skills.
traced from
PARENT · SYS-1
The pipeline shall compute all five metrics for every eligible skill.
RATIONALE
Formulas count words per sentence.
Pilot: raw Markdown lifts the median grade from 8.6 to 12.2.
Rejected: score raw text (inflated); strip all lists (drops instructions).
Assumes: skill bodies use Markdown.

FUNCTIONS
F3.5.3 Convert Markdown to sentences: R3 (prose Markdown) to R5 (sentence text). Upstream: F3.5.2 supplies R3.
satisfies
REQUIREMENT · RD-2 (critical)
When prose contains a heading, list item or table row, the normalizer shall output it as its own sentence.
verified by
VERIFICATION · T05.1 (P2, M3)
20 hand-marked files. Pass: every heading, list item and table row is its own sentence; every line has one stream.
flows down to
allocated to
LOGICAL ELEMENTS
Skill parser sends prose to the Markdown normalizer, which sends sentences to the language identifier.
built with
PHYSICAL ELEMENTS
Python regular expressions in the normalizer script
DERIVED · RD-2.1
The segmenter shall assign each line of a skill to exactly one stream.
